POULTRY SUPPLIES,
Garden and Greenhouse Supplies,
JARDINIERS and POTS, Etc.

GRAHAM BROS.

53 & 55 SPARKS ST., OTTAWA

SUNNYSIDE GREENHOUSES, RIDEAU TERRACE

OTTAWA, 1ST SEPTEMBER, 1906.

In presenting our **ELEVENTH ANNUAL BULB CATALOGUE** we take the opportunity of thanking our numerous customers for their liberal patronage in the past. Ten years ago, on the 10th September, 1896, we started business as **Seedsmen and Florists** at 29 Sparks St. and since that time, we are thankful to say, our business has steadily increased and grown until we found our old stand, 29 Sparks St., too small to handle the trade with satisfaction to both our customers and ourselves. Two years ago, therefore, we acquired by purchase Nos. 51, 53 and 55 Sparks St., and we have lately made extensive alterations to the premises and spared no expense to make our new warehouse not only an attractive one, but a thoroughly up-to-date establishment, and where we hope to be favored with the valued orders of our customers as in former years. We beg to notify our **Market Gardening and Farming Friends**, who are in charge of their horses, that the private lane at the rear of our store enters off Elgin St. (immediately in rear of the Langevin Block), and being away from the street car lines, our patrons need suffer little or no anxiety from that source of danger.

Anticipating liberal expansion of trade, we have this season imported a larger quantity than usual of the finest qualities of **French and Dutch Flowering Bulbs** from the most reliable growers, and we therefore solicit early orders for the same, and, as usual, any orders entrusted to us will receive our careful personal attention. We would respectfully urge our city friends to plant on their lawns greater numbers of Crocus, Tulips and Daffodils. Nothing adds more to the general appearance and brightness of a city, and at so little expense, than a profusion of Spring Flowering Bulbs. If Ottawa is to be worthy of the name of "The Beautiful City," or "The Washington of the North," the individual citizen must contribute his or her quota of taste and display.

We have increased the capacity of our **Greenhouses** on **Rideau Terrace** to supply the growing demand for cut Flowers, and we are now better prepared to fill orders for all seasonable cut flowers and **Floral Work** of all kinds with taste and promptitude. We have a large and varied stock of well grown Palms, Ferns, Azaleas and other decorative plants and we respectfully invite inspection of them.

The **Poultry interest** is a growing one and one which we have in the past faithfully endeavoured to supply; with our increased capacity, however, we have now the opportunity of carrying a larger and more varied stock of **Poultry Supplies**, and we invite all poultry keepers to inspect our goods before ordering outside the city.

We prepay carriage charges on all Bulbs catalogued at dozen rates and under. Bulbs catalogued at 100 rates, Plants and other articles Expressed at Customers' charges, except where noted.

We are, Yours truly,

GRAHAM BROS.

HINTS ON BULB CULTURE

The bulbs enumerated in this catalogue (particularly the Dutch and French) may for the purpose of the amateur—be divided into three classes, viz:—1. Those best adapted for house culture. 2. Those best adapted for the garden, and 3. A combination class—Those adapted for either the former modes. The first named class may again be divided into early and late blooming bulbs, the former being available at or before Christmas, and the latter from the middle of January until April or May. For Christmas blooming, only Early Roman Hyacinths, Paper White Narcissus and Chinese Sacred Lilies should be planted. For general house culture the foregoing, together with the various Hyacinths, Polyanthus-Narcissus and Daffodils, may be successfully grown. While large numbers of Tulips are grown by florists for winter flowers, the average amateur will find them difficult to manage.

For house culture pans are more effective than pots: a 5-inch pan holding one Dutch Hyacinth; a 6-inch pan holding five Roman or Dutch Pan Hyacinths, and for Narcissus larger pans should be used.

When planting use any **light, moderately rich soil** (avoiding any manure that is not thoroughly decomposed). We can supply a Special Compost at 25c. per bushel. Fill the pots or pans loosely almost to the top, press the bulbs into the soil so that only about one-quarter will show above the surface, strike the pot sharply to settle the soil, water thoroughly and place away in a **cool dark situation**. The ideal situation is outside (their native soil) covered with sufficient leaves or other material to prevent severe freezing. But as in winter they are somewhat difficult to get at if treated thus, the next best place is a **cool cellar**. The bulbs being covered with **three or four inches of leaves, sawdust or sand to exclude the air and retain moisture**.

Examine them occasionally to see that they do not become dry, and keep them two or three months before bringing them to the light. As the leaves and flowers develop do not stint the water. Keep them cool even then, and they will help to cheer the winter's gloom wonderfully. Freesias and Easter Lilies do not require to be started in the dark.

Hyacinths Grown in Glasses.

For glass culture the Highest grade bulbs only should be used. Clean out your glasses thoroughly. Fill the glasses nearly full with soft water, and place the bulb so that its base nearly touches the water. The glasses may then be placed in a box in a cool, dark cellar, and covered with leaves as before mentioned. Look at them now and again and replenish the water if it is offensive, keeping it up to the same level, but **not in direct contact with the bulbs** or the latter may rot. Leave your glasses in this position for two months or more, bringing them into the light to flower as they are wanted.

Bulbs Grown Outside.

Hyacinths, Tulips of all kinds, Crocus, and many varieties of Daffodils, are perfectly hardy outdoors. For outside culture (the Tulip being pre-eminently the most popular), plant thickly and deeply—six inches apart and six inches deep—except Crocus and other small bulbs, which should be planted at less depth—early as possible in October. Cover with a few inches of litter the end of November. Remove same first thing in spring, and nature will do the rest.

ONE DOLLAR COLLECTIONS OF HIGH GRADE FLOWERING BULBS

For the benefit of those who are at a loss in selecting suitable bulbs for House and Outdoor Culture, we offer the following collections of what, in our own experience, we consider the most satisfactory varieties.

On the receipt of \$1.25 we will mail either collection to any address in Canada. When not posted, price \$1.00 each.

Collections for House Culture

- 6 Early Roman Hyacinths
- 6 Dutch Hyacinths
- 6 Pan Hyacinths in two colors
- 6 Paper White Narcissus
- 6 Best Forcing Tulips
- 6 Trumpet Princeps Narcissus
- 6 Mammoth Freesias

Collections for Outdoor Culture

- 25 Double Mixed Tulips
- 25 Single Mixed Tulips
- 50 Crocus, Giant Flowering
- 25 Double Parrot Tulips
- 25 Narcissus Poeticus Ornatus

The above bulbs must not be confounded with the low grade cheap bulbs generally sent out in collections.
OURS ARE STRICTLY FIRST CLASS.

The Bulbs on this Page Should be Planted as Early in September as is Convenient

FREESIAS

Refracta Alba

OR AFRICAN LILY of the VALLEY

Easily cultivated indoors and one of the prettiest and sweetest scented winter flowers.

This is really not a bulb, but a corm, consequently, should not have the cold, dark treatment of Dutch bulbs. Plant 6 or 12 in a pot and grow in the light from first to last. Water sparingly until well established.

Mammoth Bulbs, 20c. per doz., \$1.25 per 100

Freesia

Early Roman Hyacinths

Roman Hyacinths are the only Hyacinths that will bloom satisfactorily for Christmas.

Roman Hyacinths should be planted as early as possible; from 3 to 6 bulbs in a pot make a good display.

Extra Selected, 13 to 15 centim:
6c. each, 50c. per doz., \$3.50
per 100.

First size, 12 to 15 centim: 5c.
each, 40c. per doz., \$3.00 per
100.

In all classes of Hyacinths we will sell 25 Bulbs at the 100 rate.

Easter Lily

Lilium Harrisii, or Easter Lily

Are the first bulbs to arrive.

They should be potted as early as possible.

These bulbs this season are solid and healthy.

This is the best and most floriferous lily for winter blooming, and is one of the most profitable flowers that can be grown by florists. Excellent for pot culture.

Ferns—Our stock of house ferns this season is large varied and in fine condition. We offer only those varieties that are most suitable for house culture, including Adiantum Cuneatum, Adiantum Pubescens, Cyrtomium, Nephrolepis Piersonii, Nephrolepis Bostoniensis (Boston Fern), Nephrolepis Cordata Compacta (Sword Fern), Nephrolepis Scottii, Pteris Cretica, Pteris Ouvrardi, Pteris Tremula, Magnifica, Aspidium, etc. Plants 10c., 15c., 25c., 40c., 50c., 75c., \$1.00 and \$1.50 each.

FERNS IN PANS—These are constantly growing in popularity for table and window decoration. We can supply pans of mixed ferns prettily arranged at 30c., 40c., 50c. and 75c. each.

Primulas—There is probably no blooming plant grown that will give so much pleasure for so long a season, with so little care and expense as a Primula. Our stock this season, from high grade seed, is very promising. Price, 25c. each.

Primula Obconica—A profuse blooming primrose bearing on long spikes 10 to 15 flowers; white, shading to blue, 25c. each.

Rubber Plants (Ficus Elastica)—One of the finest plants for parlor decoration. Its thick, leathery leaves enable it to stand excessive heat and dryness, while their imposing size and deep glossy green always present a cheerful and effective appearance. Price, plants 10 to 12 inches high, 50c. each; 15 to 18 inches high, 75c. each; plants 2 to 2½ feet high, \$1.50.

Pandanus Utilis (Screw Pine)—Large plants of these are very handsome. Price, 50c.

Pandanus Veitchii—A finer and variegated form. \$2.00 each.

PALMS.

Palms have become an almost indispensable feature in all decorations, whether for apartments, conservatories or window gardening. We have, this season, a larger and better stock than ever before. The varieties we offer are selected as being the best adapted to general cultivation in house or conservatory.

Asparagus Plumosu

Cocos Weddelliana—This beautiful palm is unquestionably the most graceful in cultivation. It is admirably adapted for centres of jardiniers, and for dinner table decoration it cannot be excelled. Price, 50c., 75c. and \$1.00 each.

Kentia Belmoreana—This, and the following, are undoubtedly the most satisfactory and most effective for house culture. They are capable of standing more ill usage than any other class. Price, \$5.00, \$3.50, \$2.00, \$1.25 and 50c. each.

Kentia Fosteriana—A more vigorous grower than the preceding variety, plants the same price averaging about one-quarter larger than it, otherwise the appearance is almost identical. Price, \$5.00, \$3.00, \$2.00, \$1.25, 50c. and 25c. each.

Latania Borbonica—This is the typical Palm, and has, perhaps, in the past, been more largely used than any other. Its large, deeply-divided fan-shaped leaves are very attractive, while the plant is extremely hardy. Price, \$2.50, \$1.50 and 75c. each.

Phoenix Reclinata—A large growing, graceful palm of easy cultivation, large specimens being especially effective. Price, \$3.00 and \$1.50 each.

Dracaena Indivisa

HARDY PERENNIALS

We have a large and varied stock of these increasing popular plants. Nearly all of herbaceous nature may be moved in autumn, while some, notably Pæonies, give better satisfaction if established at this season.

Call or write for any information on this matter.
